SERVING THE PEOPLE OF TULLY

ICE HARVESTING

Unfortunately, weather conditions and lack of manpower are not conducive to having the harvesting of ice at Green Lake possible this year. Ice Harvesting was once a main winter industry in Tully, dating back over 100 years. This was spurred on by the natural formations known as the Tully Kettle Lakes. The Ice Harvesting Industry employed several hundred people in the area, up to the 1930's. There were four ice warehouses in the Village, as well as most farmers had their own Ice House to keep their milk cold until time of shipment. Ice was stored in the warehouses for shipment via rail; as well as door-to-door ice delivery to households in the area. It is recorded that one year 1,000 tons of ice was harvested just from Green Lake. Ice was also harvested in those days from Tully, Song, and Crooked Lakes.

Stop in at the Tully Area Historical Society to view ice harvesting pictures, literature, as well as the various ice harvesting tools. There will be a video for your viewing. Hours are every Monday, Tuesday, Friday & Saturday 9-1.
